

Karl-Friedrich Berger/Sandra Kiefer (Hrsg.)

## DICTIONARY OF SEALING AND GASKET TECHNOLOGY

### German-English-Chinese-Pinyin

By Rudolf Hawellek / ZhengMing Wu

The translation aid provides basic technical terms from the sealing and gasket technology branch as well as its subcategories in the following areas:

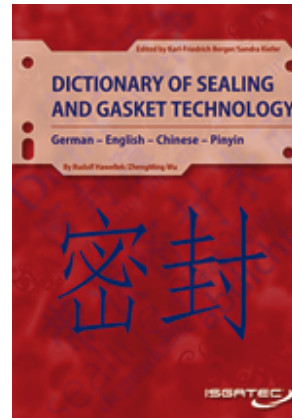

- Materials
- Semi finished products
- Sealing systems
- Processing techniques
- Tools
- Measuring controlling
- Failure analysis
- Adhesive technology
- Quality assurance
- Purchase/Logistic

Decades of experience accumulated by sealing technicians, engineers and technical translators have been incorporated into this dictionary.

The translation is also in Pinyin, a phonetic transcription for Chinese characters. Pinyin is an official script in the P.R. China and is registered with the ISO.

Karl-Friedrich Berger and Sandra Kiefer are the managing directors of ISGATEC, the only management consultancy firm in Europe which is specialised in the seals, rubber and plastics market. ISGATEC offers the sealing and gasket branch this dictionary alongside their core consulting, coaching, mergers and acquisition services.

The company organises the ISGATEC international trade fair which is held every eighteen months. The fair has an integrated expert forum which is focused at the topic of sealing and gasket technology.
