The space for your market communication

ISGATEC knowledge management – what is it? Modern knowledge management faces today, several challenges:

We design communication spaces in which professionals can

- find the impulses they need,
- use the media channels they use and
- make direct contact with your experts.

Our approach creates communication spaces for your marketing and that is what makes these spaces so special:

- **Focus on industries that need your solutions** – ISGATEC is a knowledge management provider that has been focusing on the topics of sealing, bonding and polymers in the automotive, energy technology, electronics, mechanical and plant engineering, chemical, food technology, pharmaceutical, medical and construction/crafts sectors for over 20 years.
- **Reach everyone involved in decision-making** – We support all functional areas along the value chain of a product – from design, purchasing, plant planning, production, quality assurance and maintenance to corporate management.

- **Space for networking and your leads** – In the 'knowledge rooms', we connect content ideas, specialist knowledge and people with the aim of quickly bringing the right people together to discuss projects, issues, etc.

- **Cross-media and multimedia processing** – We build cross-media 'knowledge spaces' (media, web, events, social media, etc.) and use all forms and channels of content that target groups use in a networked manner today (print, video, online, social media, etc.).

This concept offers space to

- to generate attention and reach among relevant target groups,
- making companies and brands visible on the basis of
- strengthen one's own market position
- and ultimately win customers.

Being there when solutions are needed

Our Lösungspartner (solution partner) concept acts as a booster in the ISGATEC competence and knowledge network. Your advertisements and content will be linked to your solution partner entry across all channels. Users of the assistance systems will also be able to find you at www.isgateg.com. As a business solution partner, your content will also be shared on the ISGATEC LinkedIn news channel, which significantly and purposefully increases the visibility and reach of your company outside the ISGATEC network. From a marketing and sales perspective, this concept not only gives you maximum networked visibility and reach. It also makes it easier for potential customers to get in touch with your company's specialists.

Your **Lösungspartner** entry will be **linked** to all your contributions (print, digital).

Your benefits

Booster for all marketing concepts (integrated to stand-alone)

- Sales support in the field of Sealing. Adhesive. Polymer.
- Support for all marketing concepts (Ad campaigns, content marketing, social media marketing and combinations)
- Direct linking to your website and LinkedIn (via content)

Relevant reach in your core topic

- Minimization of wastage saves resources and unnecessary enquiry processing
- Contact quality before quantity (reports/ figures – on request)
- „Interface“ to relevant business portals (LinkedIn)

High visibility

with potential and existing business contacts

- Independent information procurement for your potential customers (research and reading)
- Show your customers what you do, how you position yourself on current issues and invite dialogue.

Read-along rate (Print): Ø 2.5
Magazines are passed on in the companies

The German-language multichannel magazine DICHT! is the source of inspiration in the field of Sealing. Adhesive. Polymer. Based on a wide range of information on market developments, trends, practical applications, products, services and surveys, decision-makers across all functions receive inspiration for solving their daily tasks. The digital version offers unique opportunities to deepen these insights directly with industry partners. The digitally optimised editorial concept with links, video reports (DICHT! vor Ort), multiple navigation, function-related short reading sections, etc. facilitates team decisions – and creates the basis for an efficient decision-making and procurement process.

Space for your expertise across all industries

The **JAHRBUCH 2027 Dichten. Kleben. Polymer.** is freely available! (digital version)

Published since 2004, the Jahrbuch Dichten. Kleben. Polymer. (Sealing. Adhesive. Polymer.) is the space for in-depth knowledge within the ISGATEC competence and knowledge network. It offers valuable insights and background information for decision-makers from a wide range of industries. Expert reports on new developments, application-related solutions and research results provide a well-founded overview of the current status and an outlook on upcoming developments. Authors from science and practice share their knowledge in a practical and comprehensive manner. In the interactive version, readers can contact the authors directly and explore individual questions in greater depth.

Pages of competence

The space for your solutions and answers

Fig.: Nick auf Pixabay

Increase the **visibility** of your business with **banner or image text ads**. With us you will learn how to achieve your marketing goals in a targeted way.

The online portal of the ISGATEC competence and knowledge network is the place for your answers when decision-makers are looking for solutions to current issues. Daily news about companies, new products and services, applications in practice and comprehensive service sections support the daily work of decision makers as required. These include, for example, checklists for sealant and adhesive procurement, sections on materials, damage analyses, comments on current developments and survey results. The assistance systems guide users directly to relevant solution partners via their questions. From a marketing perspective, www.isgatec.com is the space for visibility when decision-makers are looking for solutions to current issues

- Medical technology
- Sealing. Adhesive. Polymer.

B2B podcasts – More than just hype

Note in DICT!

Newsletter display

Website www.isgateg.com

LinkedIn post display

Streamable on Spotify, Apple Music, Deezer, etc.

Podcasts have established themselves in B2B marketing. They offer companies the opportunity to convey complex content in a comprehensible, personal and authentic way – without requiring much effort on the part of the target group. Especially in specialised industries such as sealing, bonding and polymers, they open up new avenues of communication: approachable, practical and professional.

Whether on the road, in the office or on the way to the next trade fair, podcasts reach experts where traditional formats often reach their limits.
